

SUBJECT: FIELD TRIPS

It is recognized that field trips are instructional techniques that increase instructional effectiveness. Teachers, with their respective program supervisor, must determine whether the field trip is the most appropriate procedure to meet the instructional objective.

Field trip parental permission slips must be completed and sent home with each participating student. A signed permission slip from the parent/legal guardian must be received before the student may participate in the trip.

All field trips shall be carried out in accordance with regulations and procedures developed by the District Superintendent.

Any overnight trip or trips that exceed 100 miles (one way) requires advance approval of the District Superintendent or designee.

Adopted: March 13, 2002
